

## TSM Five Question Quiz

[PP 05/12/2019 - 05/25/2019]

### Raw Sewage (Personal Hygiene)/Blood Borne Pathogens

1. List the five best PPE that workers should use when handling human waste/sewage.

- \_\_\_ a \_\_\_\_\_
- \_\_\_ b \_\_\_\_\_
- \_\_\_ c \_\_\_\_\_
- \_\_\_ d \_\_\_\_\_
- \_\_\_ e \_\_\_\_\_

2. You should treat all bodily fluid as if they are \_\_\_\_\_.

3. An inspector goes for lunch after spending all morning inspecting installation of a new sewer in an open cut excavation with live sewage present. After eating his “home” lunch he returns to work but is soon overcome by nausea and vomiting. He realizes that his clothes are moist from raw sewage. What should he/she do?

- i. Immediately wash hands and return to work
- ii. Contact Medical Services
- iii. Call supervisor
- iv. Take a nap in his mileage vehicle and hopefully sleep it off
- v. Nothing it is part of the job

4. In summary, anything that comes **OUT** of a human body is a biohazard: if it's moist and it comes from a person, keep safe, keep away and avoid contact.

True \_\_\_\_\_ or False \_\_\_\_\_

5. Often in sewer construction there is raw sewage flowing in the pipe. What precautions do you take to ensure limited exposure?
