

HEARING CONSERVATION PROGRAM

1. BCA HCP policy states that an inspector may inspect without hearing attenuation PPE provided they are standing no closer than 20 feet from the construction activity.

True _____ or False _____

2. Which statement is a correct definition for HCP Administrative Controls?

- 1) Written policies found in the Greenbook
- 2) Written policies that are referenced in the contract document GR or GCs.
- 3) Directives that change workers' activities and emphasize policies that can lower their exposure
- 4) Rules that eliminate the source of the noise or separate it from workers

3. If a BCA task assignment requires the use of hearing protectors which of the following provide the most effective noise attenuation?

- a Earplugs
 b Earmuffs
 c Using earplugs and earmuffs together
 d Hard hats with earmuffs

4. Noise-induced hearing loss is the term for hearing damaged by exposure to excessive noise. The damage to hearing caused by too much noise may not be apparent for years but once a worker is no longer exposed to loud noises their hearing loss can be cured.

True _____ or False _____

5. BCA inspectors have mandatory hearing attenuation use around excessive noise when (complete)?

- a. Continuous inspection within 20 feet is required
 b. Within 100 feet of pile driving activities
 c. Exceeds more than 4 hours within the 8 hour day.
 d. _____
